Index of Subjects

Aeromonas, adhesion to, sp. to cell lines used as models for intestinal adhesion, 465
Aeromonas, distribution of, phenospecies and genospecies among strains isolated from water, foods or from human clinical samples, 39
Amblyomma hebraeum, laboratory reared, and *Amblyomma variegatum* ticks differ in their susceptibility to infection with *Cowdria ruminantium*, 345
Amblyomma variegatum, laboratory reared *Amblyomma hebraeum* and, ticks differ in their susceptibility to infection with *Cowdria ruminantium*, 345
Antibiotic resistant, control of infection with multiple, bacteria in a hospital renal unit: the value of plasmid characterization, 61

β-Lactam resistance in normal faecal flora from South Africa, 243
Burkholderia pseudomallei, RAPD analysis of isolates of, from patients with recurrent melioidosis, 115

Campylobacter, effect of changes in processing to improve hygiene control on contamination of poultry carcasses with, 495
Campylobacter jejuni, comparison of PFGE, ribotyping and phage-typing in the epidemiological analysis of, serotype HS2 infections, 215
Campylobacter, the Public Health Laboratory Service national case-control study of primary indigenous sporadic cases of, infection, 15
Campylobacter, the speciation and subtyping of, isolates from sewage plants and waste water from a connected poultry abattoir using molecular techniques, 485
Canoeists, a serosurvey of water-borne pathogens amongst, in South Africa, 299
Cowdria ruminantium, laboratory reared *Amblyommas hebraeum* and *Amblyomma variegatum* ticks in their susceptibility to infection with, 345
Cowpox, serological evidence for the reservoir hosts of, virus in British wildlife, 185
Cryptosporidiosis, an outbreak of, associated with a resort swimming pool, 545
Cryptosporidiosis, an outbreak of, in South London: what value the p value, 279
Cryptosporidiosis, an outbreak of waterborne, associated with a public water supply in the UK, 123
Cryptospioridiosis, outbreak of, associated with a disinfected groundwater supply, 555

Entamoeba histolytica, prevalence of antibodies against, in Mexico measured by ELISA, 535
Escherichia coli, characterization of verocytoxin-producing, O157 isolates from patients with haemolytic uraemic syndrome in Western Europe, 1
Escherichia coli, isolation of enterotoxigenic, from British troops in Saudi Arabia, 455
Escherichia coli, the role of heightened surveillance in an outbreak of, O157.H7, 447

Faecal contamination on children's hands and environmental surfaces in primary schools in Leeds, 527
Foot-and-mouth disease, antigenic analysis of SAT 2 serotype, virus isolates from Zimbabwe using monoclonal antibodies, 193

Genital warts, hand–genital transmission of? An analysis of prevalence data, 169

Haemolytic uraemic syndrome, characterization of verocytotoxin-producing *Escherichia coli* O157 isolates from patients with, in Western Europe, 1
Haemopohilus influenzae, epidemiology of invasive, infections in England and Wales in the pre-vaccination era (1990–2), 89
Hepatitis A, prevalence of, antibody among disadvantaged gypsy children in northern Spain, 157
HIV-1, inactivation of, by chemical disinfectants: sodium hypochlorite, 567

Influenza, analysis of, a virus reinfection in children in Japan during 1983–91, 591

Influenza, study of the effectiveness of, vaccination in the elderly in the epidemic of 1989–90 using a general practice database, 581

Jembrana, the transmission of, disease, a lentivirus disease of *Bos javanicus* cattle, 367

Legionella pneumophila, molecular chracterization of a virulence-associated epitope on the lipopolysaccharide of, serogroup 1, 71
Legionella, relationship between, spp. and antibody titres at a therapeutic thermal spa in Portugal, 79
Listeria, occurrence of, species in ready to eat foods, 519

Measles, interpretation of serological surveillance data for, using mathematical models: implications for vaccine strategy, 139
Measles, priorities in global, control: report of an outbreak in N'Djamena, Chad, 309
Measles vaccination policy, 603
Measles vaccine efficacy during an outbreak in a highly vaccinated population: Incremental increase in protection with age at vaccination up to 18 months, 315
Meningoococcal, epidemiologial investigation of an outbreak of, meningitis in Makkah (Mecca), Saudi Arabia, 1992, 399
Meningococcal, targeted vaccination with, polysaccharide vaccine in one district of the Czech Republic, 411

Oysters, an outbreak of viral gastroenteritis associated with adequately prepared, 163

Pandemics, virology research and virulent human, 377
Poliomyelitis in the Netherlands: a review of population immunity and exposure between the epidemics in 1978 and 1992, 289

Rattus norvegicus, cryptosporidiosis reservoir in wild brown rats, in the UK, 207
Rickettsial, evidence for a high prevalence of spotted fever group, infections in diverse ecological zones of Inner Mongolia, 177

Salmonella enteritidis, chaos under canvas: a, PT 6B outbreak, 513
Salmonella outbreak from microwave cooked food, 227
Salmonellosis, a pseudo-outbreak of, 31
Salmonellosis, nationwide outbreak of human, in Germany due to contaminated paprika and paprika-powdered potato chips, 501
Schistosoma mansoni, the development of an age structured model for schistosomiasis transmission dynamics and control and its validation for, 325
Staphylococcus aureus, analysis of methicillin-resistant and methicillin-susceptible, by a molecular typing method based on coagulase gene polymorphisms, 419
Staphylococcus aureus, carriage of, among 104 healthy persons during a 19-month period, 51
Streptococcal, a cluster of cases of, necrotizing fasciitis in Gloucestershire, 387
Streptococcus pyogenes, clonal structure of invasive, in Northern Scotland, 231

Tick-borne encephalitis, roe deer as sentinels for endemicity of, virus, 355
Trimethoprim, prevalence and genetic location of non-transferable, resistant dihydrofolate reductase genes in South African commensal faecal isolates, 255
Tuberculosis in Inner London: evidence for an increase in young adults and immigrants, 133
Typhoid, infecting dose and severity of: analysis of volunteer data and examination of the influence of the definition of illness used, 23

Vibrio cholerae, an epidemiological study of, O1 in the Australian environment based on rRNA gene polymorhisms, 435
Vibrio cholerae, biotype traits and antibiotic susceptibility of, serogroup O1 before, during and after the emergence of the O139 serogroup, 427
Viral gastroenteritis, an outbreak of, associated with adequately prepared oysters, 163

Whooping cough, application of pulsed field gel electrophoresis to the 1993 epidemic of, in the UK, 101
